The Clifford C. Clogg Award was established by the PAA Board of Directors at the Fall 1995 meeting, in recognition of distinguished work in population statistics. Beginning with the 2000 award, the terms have been modified. The award will now recognize early career achievement in population studies and demography, broadly defined. It will honor outstanding scholarly achievements of a population professional who shall have attained his or her highest professional degree within the previous 20 years, 1992-2012. It is awarded biennially in even-numbered years at the PAA Annual Meeting.

The award is sponsored by PAA in association with the Population Research Institute of the Pennsylvania State University, and commemorates the contributions of Clifford C. Clogg, a renowned expert in quantitative methods and labor force demography at Pennsylvania State University. Dr. Clogg made creative contributions to census and survey design and data collection systems through his work with the National Academy of Sciences panels, PAA committees, and the U.S. Bureau of the Census. His scholarship included work in the analysis of rates, standardization methods, latent structure analysis and the modeling of categorical data. Through his teaching and numerous workshops worldwide, he left a legacy as a mentor to the discipline in population statistics.

The Clifford Clogg Committee consists of seven members, serving for two selection rounds (four-year terms). Vacancies should be filled in the latter half of a selection year, so that the Committee can meet at the Annual Meeting. The Committee includes the two most recent recipients, and five members, including the chair, appointed by the PAA President.
