Map of Maternal Mortality, Worldwide

2000 Maternal deaths per 100,000 Live Births

Source: WHO, UNICEF, and UNFPA, *Maternal Mortality in 2000: Estimates Developed by WHO, UNICEF, and UNFPA*, 2004.

© Population Reference Bureau

Lost: Life, Rights, and Productivity

- **Globally, one woman dies every minute** from complications of pregnancy and child birth.
- High maternal death rates are an indicator of inadequate health care system, which is clearly a **direct violation of women's fundamental rights to life, health, and self determination.**
- Every year, **the world loses US \$15 billion to lost productivity** by letting women die in pregnancy and childbirth.

Ugandan Population: Large and Growing Rapidly

Total population, 2008	31 million
Projected population, 2050	130 million
Projected population change 2007-2050	319%
Population younger than age 15	50%
Lifetime births per woman	6.7
Maternal mortality ratio	435

Uganda: Why do pregnant women die?

Many high-risk pregnancies

- too early
- too close
- too many
- too late

Government unable to provide quality reproductive health services, especially in rural areas

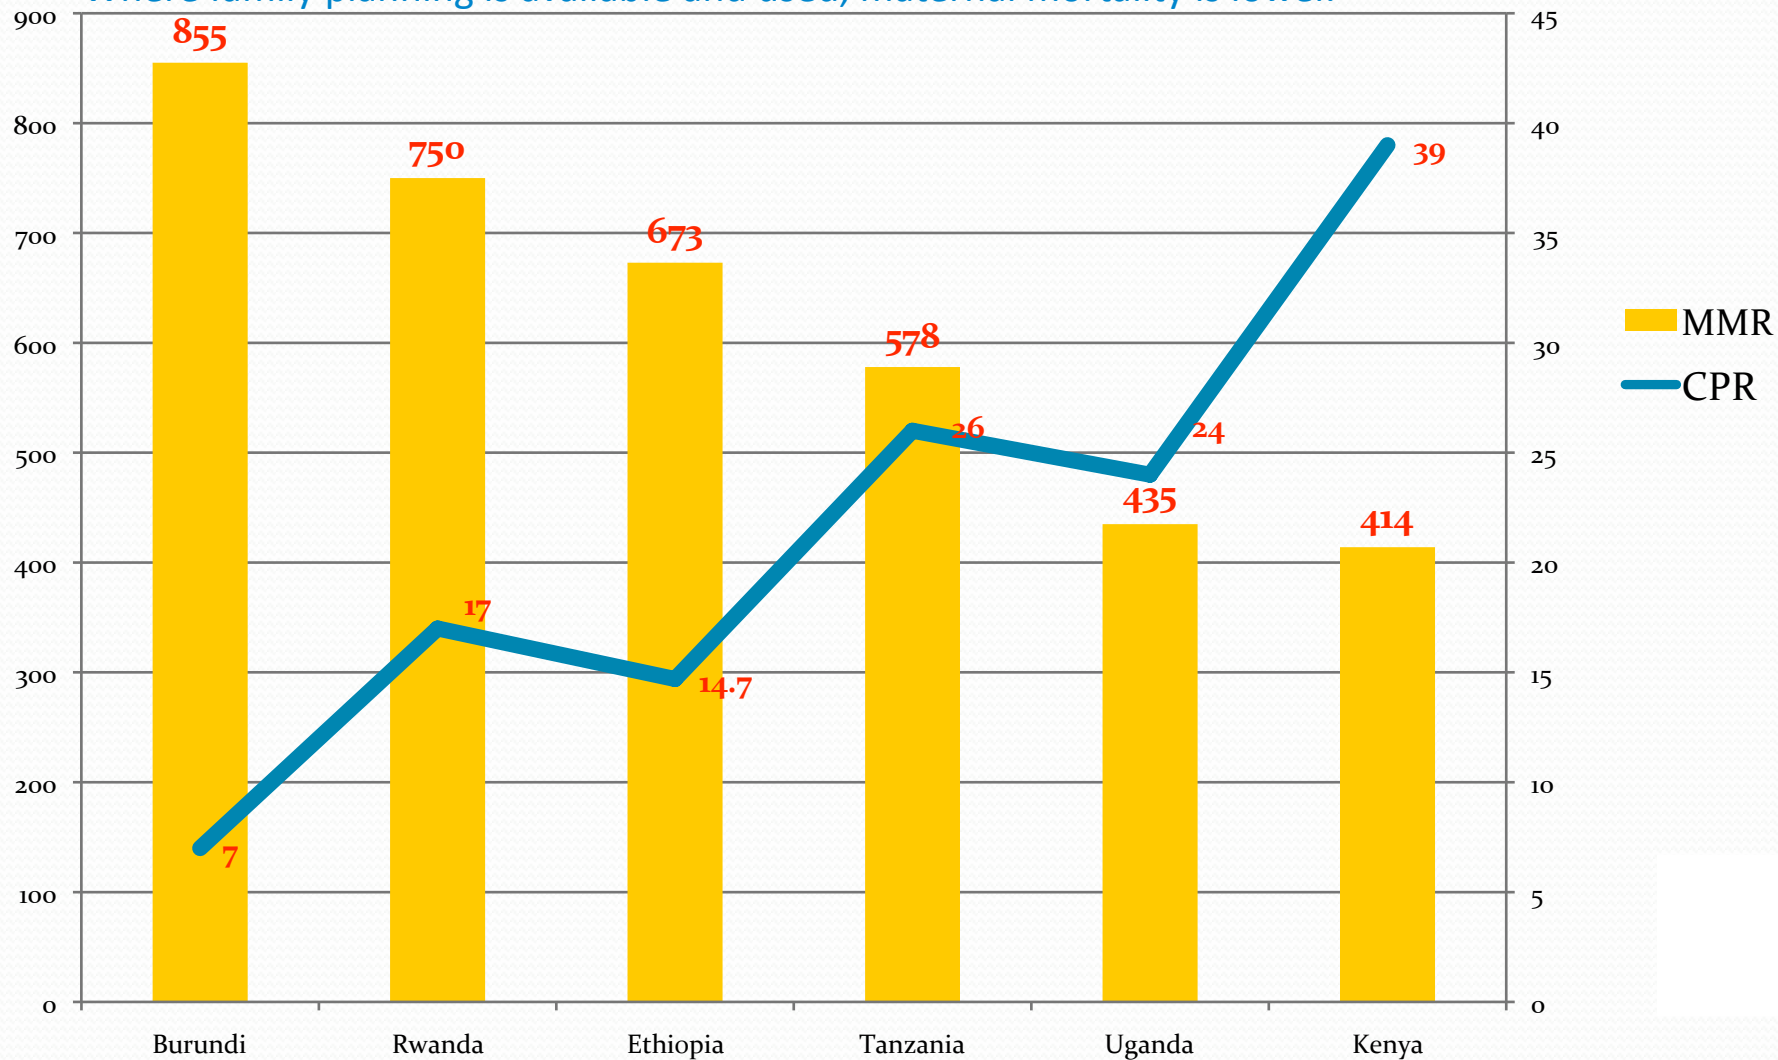

Effective, Low-Cost Strategies Exist to Improve the Health of Mothers and Children

- Family planning and other reproductive health services
- Skilled care during pregnancy and childbirth
- Emergency care when life-threatening complications develop
- Immediate postnatal care for mothers and newborns

Family Planning Reduces Maternal Death Up to 40%

Where family planning is available and used, maternal mortality is lower.

A \$1 Million Family Planning Investment Prevents:

800	Maternal deaths
11,000	Infant deaths
14,000	Under-5 children's deaths
150,000	Induced abortions
360,000	Unwanted pregnancies

Family planning is one of the most cost-effective ways for poor countries to make progress.

Uganda's Future: Improving the Health of Mothers and Children

- Families with fewer children can devote additional resources to enhanced education, nutrition, and health.
- Mothers who space their children have more opportunity for paid labor, education, and personal development.

What is the message?

**NO WOMAN SHOULD LOSE HER LIFE WHILE
GIVING LIFE.**

Thank you!
