March 15, 2007

The Honorable Tom Harkin, Chairman

The Honorable Arlen Specter, Ranking Member

Senate Appropriations Subcommittee on Labor, Health and Human Services, Education and Related Agencies

Dear Chairman Harkin and Ranking Member Specter:

The National Center for Health Statistics (NCHS) is the nation’s principal health statistics agency. Housed within the Centers for Disease Control and Prevention (CDC), it provides critical data on all aspects of our health care system. Yet current funding levels threaten the collection of vital information. To address this problem, the Friends of NCHS recommends a FY 2008 funding level of $117 million for the agency, an increase of just $8 million over FY 2007.

Many federal agencies claim that their programs yield savings. The NCHS actually does save money by collecting and analyzing data for other agencies, including the National Institutes of Health. Using NCHS’s existing resources and expertise to create efficiencies saves the government millions of dollars in start up costs, government contracts, and duplicative data collection.

Nevertheless, current funding levels for NCHS are precarious. Since FY 2005, NCHS has lost $13 million in purchasing power due to a combination of flat funding and inflation. As a result, key NCHS programs are in jeopardy. For example, NCHS lacks resources to collect a full year’s worth of vital statistics from states. Without at least $3 million in additional funding, we will become the first industrialized nation unable to continuously collect birth, death, and other vital information. Funding shortfalls are also preventing the collection of data on many other key health care issues (please see attachment for more details).

In order to address these challenges, the Friends of NCHS recommends an FY 2008 budget allocation of at least $117 million for the agency, an $8 million increase over the FY 2007 amount. This funding level would enable NCHS to ensure uninterrupted collection of vital statistics, restore other important data collection and analysis initiatives, and modernize its systems to increase efficiency, interoperability, and security.

The Friends of the NCHS is a group of organizations that want to ensure the agency’s continued vital role in monitoring our nation’s health. For more information, contact Emily Rowe at 202.292.6743 or emily.rowe@academyhealth.org.
